

## Eurofins - Certification in line with the market

### Accredited comprehensively, recognized globally

Eurofins is your competent partner for national and international approval and certification of telecommunication systems, radio systems and electric devices, such as household appliances, consumer electronics, audio/video devices, office equipment, computer products and IT-Systems. Eurofins an independent certification body and accredited according to international standards and offers a wide range of product and systems certification schemes.

Certification by Eurofins strengthens the trust of your clients in your products and opens the world's markets to you.

### About Eurofins

Eurofins is a global Life Science company, serving diverse industries like food, pharma, environment and engineering as well as retailers and manufacturers of cosmetics, toys, electrical and electronic equipment and medical equipment, to name just a few. With a unique network of 7000 employees and 150 laboratories and test centres in 30 countries, Eurofins is one of the top providers of analytical services.

The service offer includes over 25000 reliable analyses, defining safety, purity, identity, composition or origin of substances or products. Eurofins' business line Product Testing offers international expertise around safety and quality of products on the global marketplace. Services range from certification and compliance checks to consulting, performance and panel testing.
